ADAM SHELTON IS #SCRUFFSENOUGH

By trade he's a carpenter from Hessle, East Yorkshire. At the weekend he's a rising star in the British Thundersport Superstock 1000 Championship. Adam Shelton embodies the #SCRUFFSENOUGH attitude, and Scruffs is proud to be his official sponsor.

HERE'S WHY ADAM SHELTON IS SCRUFFS ENOUGH FOR ANYTHING...

When did you start racing?

Actually, I started in karting when I was 6 years old. I karded until I was 12 years old. The issue with racing on four wheels is that eventually you have to move on to cars, which is expensive. I was at a kart meeting when I noticed kids on mini moto's. I had a go, got one for Christmas, and came seventh in my first British Championship race. I've stayed on two wheels ever since.

What part does sponsorship play?

Finance is so important. I'm so grateful for my sponsors' support. I've not always been in a good position. You see other riders progress through the ranks. Some of my fellow riders are now in British Superbikes (BSB), Moto 2, Moto 3, and the World Championships. That's where I want to be.

ARE YOU
SCRUFFS
ENOUGH?

What bike are you on this season?

I've moved onto the Kawasaki ZX10, which is their superbike. It's a massive jump from a 600cc machine for me as a rider.

The bike weighs nothing, so the acceleration you get is insane - you're literally just hanging onto it. There's no rest. Half-throttle will throw you off the back and you have to manage that. On the old bike I'd hold the bike flat pinned on some corners. With the new bike I hope I would have a choice and could probably go through at 170mph, but this is where the learning comes in - managing the power. Fitness is a big thing too of course, which is why I have to hit the gym as well.

What are your ambitions?

I've stayed in the British Thundersport Championship this year because you get lots of track time to learn the bike. At full BSB Championship level there's minimal track time because you're a support race for the main series. The result is that I'll hit the BSB Championship with confidence. We've built the bike to British Championship spec, so that I can compare myself at the elite level. My best time last season would have resulted in second place in the BSB Championship.

Ultimately, I want to fulfil my boyhood dream and ride fast bikes for a living!

You can see Adam in action at all nine British Thundersport rounds that take place throughout the 2015 season. Go to www.scruffs.com for details.

SCRUFFS SWEEPSTAKE WIN £500 OF SCRUFFS!

For your chance to win, all you have to do is guess the fastest lap time of Adam on the Scruffs ZX10R Kawasaki in his next British Thundersport race.

SCRUFFS FOOTWEAR SIZE GUIDE

FIT TIPS

Not all brands of footwear fit the same. The standard size guide below is a good indicator on what size you should wear, but there may be slight variations in sizing between different brands. Most foot problems can be prevented by wearing properly fitting footwear. Don't assume that your footwear size remains the same. The shape of your feet changes as you get older. Have both feet measured regularly as most people have one foot larger than the other. Fit to the largest foot. Always try footwear with your regular work socks. Make sure that they are laced properly. The ends of your toes should not touch the front part of the footwear. To double check the fit untie the laces and slide your forefinger down the back of the footwear behind the heel. The ends of your toes should hit the front toe part of the footwear.

SCRUFFS CLOTHING SIZE GUIDE

MEASUREMENT TIPS

The fit of workwear depends on the cut, fabric and styling of the garment. If you're not sure, follow our top tips on how to measure yourself. Then refer back to the detailed workwear size guide shown below so you know which size you should buy.

CHEST (A) Measure around the fullest part of the chest. Place the measuring tape high up under your arms and make sure it's at the same height at the back across your shoulder blades.

WAIST (B) Measure around your natural waist line, on top of any underwear that you normally wear.

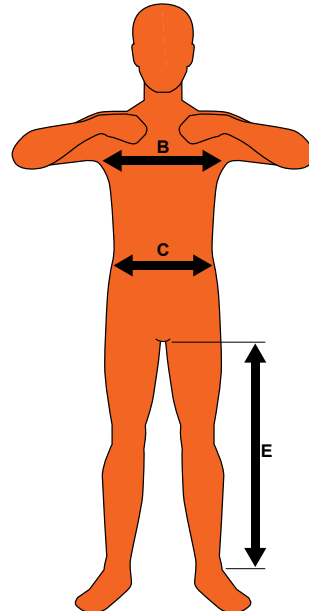

INSIDE LEG (C) Measure from the top of the inside leg at the crutch to the hem.
