WORKWEAR

THE NEXT GENERATION OF WORKWEAR

At Snickers Workwear we only have one thing in mind: to develop workwear that will truly help you do a better job. That's how it all started more than 40 years ago, when we revolutionised the industry with modern workwear based on the real needs of skilled craftsmen who have to be able to rely on their gear.

And now we are doing it again: introducing a pioneering concept with four different trouser and workwear families, each designed for different needs and types of work. It's the result of our biggest development effort ever, encompassing 10 designers, 50 hard-working test pilots, more than 200 pairs of test trousers and over 400 weeks of hard usage.

Once again we lead the way with advanced garments designed for your specific on-the-job needs, providing a superior level of working comfort, protection and functionality. Allow us to invite you to our most exciting catalogue ever – featuring the next generation of workwear.

RUFF WORK

REINFORCED TOUGH & ROUGH

Tough design for rough work. Modern heavy-duty workwear combining amazing fit with reinforced functionality. Designed for professionals relying on their gear in demanding environments.

Stay cool in the heat in these hardwearing work shorts in reinforced design with a modern jeans look. Featuring amazing fit, stretch gusset in crotch and holster pockets for outstanding functionality and long-lasting comfort. **6104 RuffWork Denim, Work Shorts+ Holster Pockets, page 30**

Tough design for rough work. Modern heavy-duty work trousers combining amazing fit with reinforced functionality. Features Cordura® 1000 reinforced knee protection, built-in ventilation and stretch gusset in crotch for hardwearing comfort at work.

6202 RuffWork, Work Trousers+ Holster Pockets, page 14

A full-page photograph of a man with a beard and short brown hair, wearing a dark navy polo shirt and teal work trousers. He is standing on a dark wooden deck, holding a black tool bag with both hands. The bag is filled with various tools, including a level, a hammer, and a saw. In the background, there is a modern building with large windows and a clear blue sky. On the left side of the image, there is a close-up of a black tool bag with a red strap and a yellow tag that says '52'. The bag has 'Hultafors' written on it. There are three orange circles on the image: one on the left side of the man's torso, one on the right side of his torso, and one on his right leg. These circles are connected by lines to text boxes.

Modern work trousers with amazing fit, combining
hardwearing comfort and functionality. Features superior
knee protection, built-in ventilation and stretch gusset
in crotch for true allround performance at work.
6201 AllroundWork, Work Trousers, page 17

A modern everyday classic. Comfy polo shirt combining
contrasting colours with plenty of space for company
profiling. **2715 AllroundWork, Polo Shirt, page 74**

**6200 AllroundWork, Work Trousers+
Holster Pockets, page 17**

A photograph of a modern building's courtyard. The foreground is filled with a large area of light-colored gravel. To the left and bottom, there are wooden decking paths. In the background, a white building with large windows and a flat roof is visible under a blue sky with scattered clouds. A semi-transparent white rectangular box is overlaid on the upper half of the image, containing the text.

ALLROUND WORK

READY FOR EVERYTHING

Modern workwear combining amazing fit and hardwearing comfort with advanced functionality. The ultimate choice for everyday work in all kinds of everyday environments.

A man is standing outdoors on a gravel surface, looking off to the side. He is wearing a blue baseball cap, a black windbreaker jacket, light blue cargo pants with black knee patches, and black sneakers with white socks. He is holding a red toolbox in his left hand. The background shows a white wall and some trees under a clear blue sky. Three blue circles with lines pointing to them are overlaid on the image, highlighting the cap, the jacket, and the pants.

9013 LiteWork, Cap, page 124

Cheat the wind in this super-light windbreaker that fits in your pocket. A perfect complement to your fleece or sweater in windy conditions. Durable, water repellent, always at hand. **1900 LiteWork Windbreaker Jacket, page 43**

Maximum ventilation, superior protection. These super-light quick-drying pirate trousers combine advanced high-functionality design with 37.5® technology and superior knee protection, ensuring outstanding cool working comfort and protection at work. **6103 LiteWork, 37.5® Work Pirate Trousers+ Holster Pockets, page 28**

A photograph of a modern building with large windows and concrete steps. The building has a light-colored facade and dark window frames. The steps are made of concrete and lead up to the entrance. The sky is blue.

LITE WORK

COOL, DRY AND VENTILATED

Light, quick-drying workwear for cool working comfort. Featuring advanced design and top of the range products with revolutionary 37.5° technology, ensuring outstanding ventilation during intense work and in warmer climates.

Camouflaged comfort, a high-quality hoodie with adjustable drawstring in the hood. Count on three-thread fabric comfort and patented MultiPockets™ convenience. **2824 FlexiWork, Camo Hoodie, page 68**

FLEXI **WORK**

SUPERIOR FREEDOM OF MOVEMENT

Taking working comfort and flexibility to the extreme. Advanced workwear with high-tech work trousers, featuring stretch fabric and body-mapped design. For the fast paced professional, always delivering, always a step ahead.

Light work trousers in high-tech body-mapped design for extreme working comfort and flexibility. Combining ventilating stretch fabric with Cordura® reinforcements and a range of pockets for outstanding freedom of movement and functionality. **6903 FlexiWork, Work Trousers+, page 21**

THE NEXT GENERATION OF WORK TROUSERS

When it comes to advanced work trousers, Snickers Workwear leads the way. And with our all-new generation of work trousers we take yet another step. It's a completely new concept introducing four different trouser families, each tailored for different needs and types of work. All of them designed for superior working comfort, every step of the way.

DIFFERENT NEEDS, DIFFERENT TROUSERS

Tough working environment? Fast pace? Working in the heat? With our new generation of trousers you can choose the ultimate trousers for the task at hand. Including heavy-duty trousers for tough jobs, super-light trousers for hot conditions, amazing allround trousers for everyday work and real high-tech trousers for fast-paced performance.

AMAZING FIT AND COMFORT

Our new generation of work trousers come in a new contemporary design with amazing fit, providing superior comfort and freedom of movement. With features such as pre-bent legs, built-in ventilation and stretch gusset in the crotch you can count on a new level of on-the-job working comfort.

CERTIFIED KNEE PROTECTION

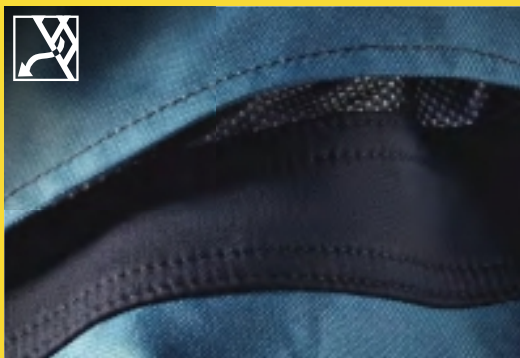

Working on your knees takes its toll. That's why our trousers feature kneepad pockets designed for the most advanced knee protection available. With KneeGuard™ and KneeGuard Pro you can protect yourself today – and save your knees for tomorrow. Read more about our range of cutting-edge kneepads on pages 32–35.

RELY ON A CLASSIC

With our classic 3-series work trousers you get advanced functionality, along with comfort and protection that you can rely on, whatever the situation. Available in a wide range of fabrics and colours, with and without holster pockets, to match your needs.

LONG, PIRATE OR SHORT?

Both our new generation of work trousers and our classic 3-series are available as work trousers, pirate trousers and shorts. Giving you loads of built-in functionality, all year round.

Our RuffWork and AllroundWork trousers feature Mechanical Air Flow™ at the hollow of the knees – ventilating openings and stretch mesh for superior inside leg ventilation and comfort.

High-tech materials at work. Read more about our advanced materials at www.snickersworkwear.com

1804

SAVE YOUR KNEES

WORLD-LEADING CERTIFIED KNEE PROTECTION

Hard-working craftsmen put more pressure on their knees than many top athletes have to endure. It's the reason why Snickers Workwear is developing the most advanced knee protection possible. With our range of cutting-edge kneepads you can count on superior EN 14404-certified knee protection.

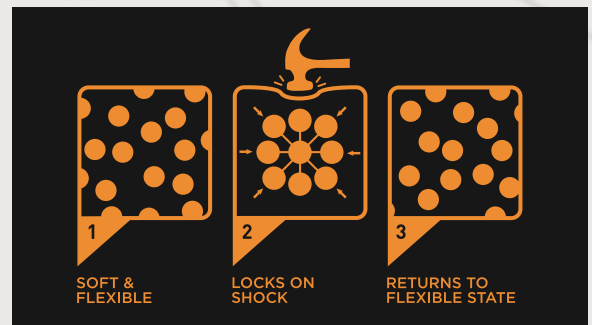

KNEEGUARD™ AND KNEEGUARD PRO

Efficient kneepads that stay firmly in position are crucial for reliable knee protection. That is exactly what you get with the Snickers Workwear KneeGuard™ and KneeGuard Pro positioning systems. They allow you to adjust the specially designed kneepads at different heights to ensure correct positioning for maximum protection. The KneeGuard Pro system also features expansion pleats above the knees, ensuring superior protection, comfort and durability.

HIGH-TECH PROTECTION WITH D30®

Our most advanced kneepads feature D30® technology, providing superior impact protection and shock absorption. It's a unique technology, providing smart and active materials that react differently depending on the impact. This means our cutting-edge D30® kneepads offer a unique combination of comfort and flexibility with extreme protection when it really counts.

Active D30® material. D30® is an active and specially engineered material made of intelligent molecules. They flow with you as you move, but on impact they lock together to absorb the impact energy.

CHOOSE THE RIGHT KNEEPAD

Do you kneel down occasionally or do you spend a lot of time working on your knees? Perhaps you kneel and stand up many times a day? Choose the kneepad that best suits your working situation.

EN 14404 **EN 14404** Knee Protection Standard.

This standard encompasses the size, force distribution, penetration resistance and user testing of kneepads.

Type 2, Level 1

Reliable knee protection for craftsmen with a mobile working environment that involves regular kneeling to perform their job. Designed to protect the knees from pebbles, nails and other small objects up to 1 cm on hard and flat surfaces.

Type 2, Level 0

Effective knee protection for craftsmen who occasionally need to work on their knees indoors. Designed to protect the knees on flat hard surfaces.

Snickers Workwear kneepads are designated and certified together with all Snickers Workwear knee pocket trousers according to EN14404:2010, Type 2. The kneepads are not certified as stand alone product and may not be used for other branded trousers.

Ergonomic design. Knees are not flat. That's why the 9191 XTR D30® Kneepads feature an ergonomic, pre-bent design that make the kneepad close around your knee when kneeling down.

Flexible when working, stiffens on impact.

Advanced D30® material – stiffens on impact and absorbs impact energy.

Hard-wearing yet flexible and comfortable polyolefin outer shell for extreme durability.

Fits in the kneepad pockets of all Snickers Workwear trousers with the KneeGuard™ positioning system.

Curved design that closes around your knee when kneeling.

Keep their shape during hard work and last twice as long as other kneepads.

Can be placed at different heights in the kneepad pockets.

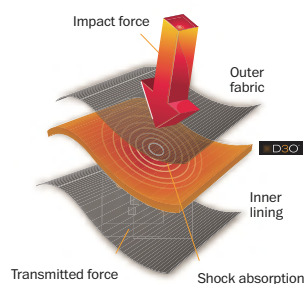

9191 XTR D30® Craftsmen Kneepads

Flexible when working, tough on impact. Active kneepads for active craftsmen, featuring shock-absorbing D30® material for extreme protection and durability. Ready for the Snickers Workwear KneeGuard™ positioning system. EN 14404 (Type 2, Level 1).

- Extremely hardwearing and cut-resistant outer shell with advanced shock absorbing D30® material on the inside that stiffens up on impact
- Keep their shape during hard work and last twice as long as other kneepads
- Ergonomic curved design that follows the shape of the knee allows for flexibility when walking, yet closes around the knee when bending down
- Can be placed at different heights in the knee pocket to ensure correct position for maximum protection
- Fits in the knee pockets on all Snicker Workwear trousers

RAINY AND NOISY?

The roll-in protective hood in super-light GORE-TEX® fabric with its advanced adjustment system can be worn over earmuffs for extra warmth in demanding working environments.

WARMTH WITH VENTILATION

The advanced body-mapped lining combines warmth with ventilation for unbeatable working comfort. Mesh lining at the back and in the armpits for optimum ventilation. Cosy quilt lining in the front for essential warmth around vital organs such as the heart and lungs.

STAY DRY

Count on outstanding dry working comfort in our advanced GORE-TEX® jackets with sealed seams. It's 100% waterproof, windproof and offers outstanding breathability for hours on end.

CONTROL THE TEMPERATURE

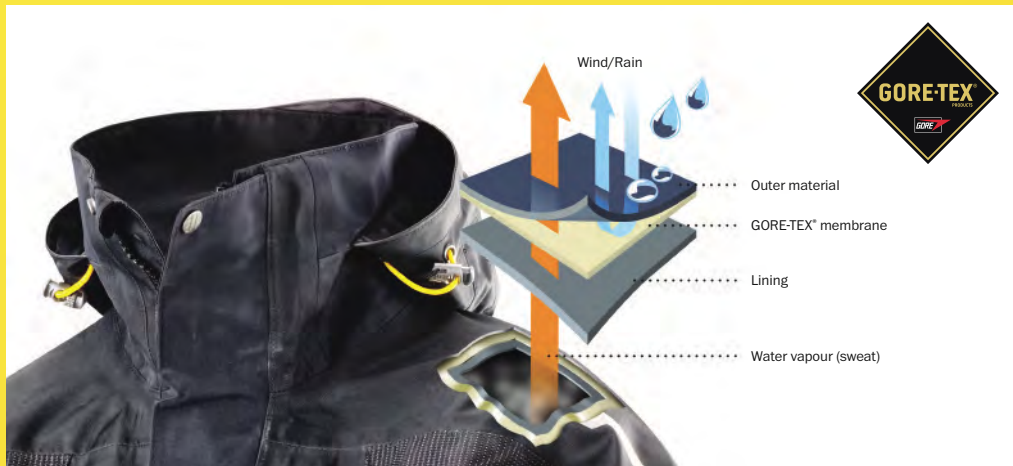

Convenient climate regulation at the waist allows you to adjust the temperature. Close to stay warm, open to increase ventilation.

High-tech materials at work. Read more about our advanced materials at www.snickersworkwear.com

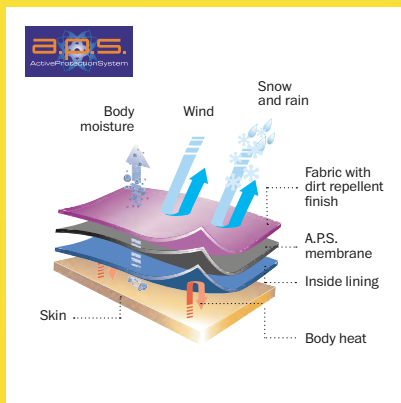

STAYING DRY ALL DAY LONG

Staying dry and comfortable in the rain is all about choosing the right type of workwear for the job. With the Snickers Workwear Active Climate System you can choose between three different types of rainwear.

For long rainy days, the cutting-edge performance of our 100% waterproof, windproof and highly breathable GORE-TEX® garments are the obvious choice. If you mainly work shorter shifts in rainy weather, our advanced all-weather garments in A.P.S. fabric will keep you covered. And for less active jobs, when ventilation is not as crucial, our PU garments are ideal.

For 100% dry working comfort during long working shifts in the rain, choose our GORE-TEX® garments.

For reliable waterproof protection during shorter shifts in the rain, choose our A.P.S. garments.

For quick and reliable protection during intense rain or stationary jobs, choose our PU garments.

EN 343

EN 343 PROTECTION AGAINST FOUL WEATHER

This standard encompasses materials and stitching and is divided into two sections: water penetration and resistance to water vapour.

For water penetration there are 3 classes, where Class 2 requires W_p (water pressure) ≥ 8000 Pa and Class 3 requires $W_p \geq 13000$ Pa. Class 1 requires the same as Class 2, but without pre-treatment.

For resistance against water vapour, that is to say RET, (the lower the rating the greater the penetration) there are 3 classes:

Class 1: $RET \geq 40$

Class 2: $20 < RET \leq 40$

Class 3: $RET \leq 20$

Water penetration is noted at the top in the symbol and resistance to water vapour is at the bottom in the symbol.

FOUL WEATHER

XTR GORE-TEX®

red dot design award
winner 2012

Our innovative Backpack was awarded the prestigious “red dot” title in the world’s largest and most prestigious design contest. The jury highlighted “the product’s innovative material, the ergonomic and modern design of the bag and the unique shape that makes it easy for the user to reach the tools”.

STAY MOBILE WITH THE RIGHT TOOL CARRIERS

You know the drill. Always on the move, from your van to the workplace, from one spot to another. When you need that special tool you need it now. In essence, you want easy access to your tools at all times. That's what our tool bags and belts are all about. Designed with cutting-edge ergonomics and functionality for extreme mobility at work.

SMART TOOL CARRYING

With our pioneering Flexi Tool Bag/Backpack, you can carry your essential tools on your back – leaving your hands free for other things or for safely climbing a ladder.

DURABLE MATERIALS

The Flexi Tool Bags and Tool Bag/Backpacks feature robust rubber-clad aluminium handles. The hardwearing bottoms in rubber-plastic reduce the risk of leaving marks on the floor and prevent the tool bags from sliding around in your van.

The hard-wearing Flexi Tool Bag features ergonomically curved design for convenient carrying along the side of your body.

EASY ACCESS

Count on superior overview and access to your tools. All Flexi Tool Bags and Tool Bag/Backpacks feature tool loops, compartments, elastic cords, multi-purpose pockets and dedicated holders for your cordless drill.

XTR – THE ULTIMATE TOOLBELT

Our advanced XTR Toolbelt takes mobile tool carrying to yet another level. It features a unique pouch attachment system that allows you to place the pouches exactly where you want them.

The Toolbelts are available with both thick leather pouches featuring double seams for superior durability, and softer yet robust textile pouches made of hardwearing Polyamide. The Toolbelt is available in two special versions, for carpenters and electricians respectively.

REG.
DESIGN

9822 Flexi Tool Bag 30 L

Cutting-edge tool bag with advanced ergonomic design and outstanding functionality, giving you easy access to your tools at all times. Hardwearing and flexible with a range of tool compartments, keeping your gear in place when on the move.

- Ergonomically curved design and outside padding for added comfort and convenience when carrying at the side of your body
- Foldable, rubber-clad aluminium handle – folds down for superior overview and access to your tools, locks in upright position for steady carrying
- Durable tool loops and compartments, including dedicated holders for cordless drills, and an easy-access, multi-purpose pocket with protective flap
- Hard-wearing bottom in rubber-plastic, reduces the risk of leaving marks on the floor and prevents the tool bag from sliding around in the car
- Ergonomic and padded shoulder strap for superior carrying comfort, while its anti-slip material keeps the tool bag from sliding off your shoulder

Material: Hard-wearing EVA base and robust PE-boards with textile interior (polyamide).

Size: 530 x 280 x 350 mm

STAY COOL AND FRESH AT WORK

When working hard or in warm climates, staying cool and fresh is not only a question of working comfort. It's also essential when it comes to safety at work. It helps you stay focused and alert, minimising the risk of making bad decisions. So when the going gets hot and humid, opt for our pioneering range of extremely quick-drying top wear, ensuring you stay dry, cool and ventilated all day long.

HIGH-TECH FABRICS.

Our high-tech A.V.S. fabric features an innovative blend of polyester and bamboo carbon. The bamboo is ground down to nano-size, one millionth of a millimetre, and blended with the polyester fibre. The result is a highly breathable material, giving you exceptional moisture transport, UV protection and anti-odour comfort.

FREEDOM OF MOVEMENT

Experience workwear that works – and moves – with you. The Snickers Workwear range of T-shirts, polo shirts, sweaters and shirts feature ergonomic designs for true freedom of movement and outstanding working comfort.

UV PROTECTION

Too much direct sunlight can damage the skin. Snickers Workwear UV-protected garments has a UPF (Ultraviolet Protection Factor) of 40+ or 50+. Our garments are tested in accordance with the international standards; EN 13758 and AS/NZS 4399:1996.

MORE THAN GOOD LOOKS

Contemporary design is just the beginning. With our inspiring range of cuts, quality fabrics and colours you'll get hard-working garments designed to work in. For real.

HIGH-QUALITY MATERIALS

All our garments are made of durable materials with specific qualities for each garment. Sturdy yet comfortable fabrics, easy-care finish, UV protection and advanced breathable materials are just a few examples.

FUNCTIONALITY EVERYWHERE

Several of our T-shirts and polo shirts feature our patented MultiPockets™ convenience, allowing you to lean forward without your mobile phone falling out.

With MultiPockets™ you have easy access to your mobile phone...

...and can lean forward without your phone falling out.

WARM AND DRY IS TOP PRIORITY

The way you dress, the way you perform. Staying warm, dry and comfortable during the winter season is all about dressing in layers. And it all starts next to your skin. Choosing the right first layer is key to keeping your body dry and ventilated throughout the working day. Whatever you choose from our range, you can count on a first layer with advanced functionality and amazing body fit thanks to superior design and extremely comfortable material.

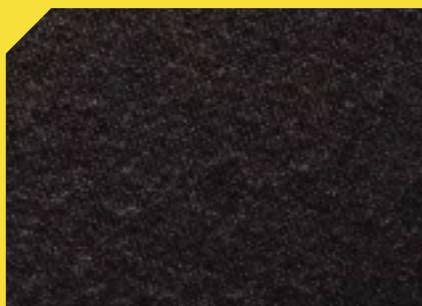

NEXT-TO-YOUR-SKIN COMFORT

All Snickers Workwear first-layer garments feature highly effective fabrics that transport sweat and moisture away from your body, keeping you warm and dry. Choosing the right type of underwear is a question of season, weather, job intensity, and of course, personal taste.

37.5° TECHNOLOGY

Extremely quick-drying fabric – five times faster than similar fabrics – for superior fresh and dry working comfort. Features high-tech active-particle technology with natural coconut charcoal particles and anti-odour treatment.

MERINO WOOL

Extremely soft and lightweight fabric for natural warmth and comfort in truly cold conditions or in less intense jobs. Highly moisture-absorbing and odour-resistant, allowing the garments to be worn for days without washing.

XTR BODY-ENGINEERED UNDERWEAR

The ultimate first layer, featuring advanced body-engineered design for a superior combination of ventilation, insulation and protection. The innovative fabric is a blend of comfortable and stretchy wicking polyesters giving you highly breathable, quick-drying material.

High-tech materials at work. Read more about our advanced materials at www.snickersworkwear.com

XTR – THE ULTIM

Advanced body-engineered fabric that transports sweat and moisture away from your skin.

Extra insulation at the shoulders and kidneys.

0418

DESIGNED FOR WOMEN FOR A PERFECT FIT

The Snickers Workwear women's range is all about one thing: uncompromising functionality, working comfort and protection, specifically designed for women. Take our new women's work trousers for example. They feature a low cut for women, Twisted Leg™ design and Snickers Workwear Gusset™ in the crotch for a perfect female fit and maximum freedom of movement.

CERTIFIED KNEE PROTECTION

Working on your knees takes its toll. That's why our work trousers and kneepads with the KneeGuard™ positioning system give you the most advanced, certified knee protection available. So you can protect yourself today – and save your knees for tomorrow. Read more about our range of cutting-edge kneepads on page 32–35.

FREEDOM OF MOVEMENT

The Snickers Workwear women's range features advanced design for a contemporary female fit with outstanding freedom of movement.

FUNCTIONALITY AT WORK

Designed for women – without compromising on functionality. Velcro tool fasteners, front and holster pockets, ruler pocket and a mobile phone compartment ensure that you have everything you need within easy reach.

Superior female fit. Every garment in our women's range is cut specifically for women. Our new advanced women's work trousers, for example, feature a low-cut waist with a shaped waistband for a perfect fit for the female form.

Contrasting design details. Pink bar tacks and other design details enhance the modern, feminine look.

STAND OUT IN THE DARK

Our cutting-edge range of High-Vis garments takes personal protection to the next level. Giving you the renowned Snickers Workwear functionality and working comfort – while making sure you are seen at all times.

VISIBLE COMFORT

The Snickers Workwear unlined High-Vis jackets and trousers are made in working comfort cotton on the inside and dirt repelling polyester on the outside. A brilliant mixture for enhanced comfort and reduced risk of sweating.

A TRUE LIFESAVER

We take personal protection seriously – without compromise. That's why for example our High-Vis jackets, T-shirts, polo shirts and vests feature reflective stripes all around, including over or across the shoulders so that you're highly visible from all directions – even when bending down.

DURABLE FABRICS FOR COLOUR-FAST PROTECTION

Our High-Vis garments feature high-quality fabrics to ensure long-lasting protection. Thanks to a certain amount of durable polyester in each garment, they retain their shape and intense High-Vis colour and resist moisture, oil and dirt – wash after wash.

High-tech materials at work. Read more about our advanced materials at www.snickersworkwear.com

EN 471

EN 471 High Visibility warning clothes This standard specifies requirements for clothing capable of signalling the user's presence visually. Performance requirements are included for colour and retroreflection as well as for minimum areas and for the disposition of the materials.

There are 3 different classes (class 3 is the highest class).

Class 3: Total fluorescent area must be at least 0.8 m² and 0.2 m² reflective material.

Class 2: Total fluorescent area must be at least 0.5 m² and 0.13 m² reflective material.

Class 1: Total fluorescent area must be at least 0.14 m² and 0.10 m² reflective material.

EN 20471

EN 20471 High Visibility Clothing. In June 2013, The Official Journal of the European Union published the new standard EN ISO 20471:2013. This harmonized standard has replaced the former standard EN 471:2004+A1:2007. Starting October 1 therefore, all CE marked High Visibility products will now have to be CE marked and certified to EN ISO 20471.

In practical terms, materials manufacturers and Notified Bodies will need time to update the required documentation for those who wish to CE mark to the new norm. It is expected that this process will take 1-2 years. Furthermore, most European notified bodies are now issuing certificates with a 5 year validity deadline in order to be able to take actions if standards change. Products CE marked to the previous norm can therefore be found on the market for many years to come. Products that are CE marked to the EN 471 and the ISO EN 20471 will therefore now co-exist on the market during the years ahead and will only change as manufactures are updating their documentation to the new norm. The new norm is not very different from the previous norm and essentially providing the same level of safety.

For more information on EN 20471 visit www.snickersworkwear.com

High-Vis Profiling

When customizing your High-Vis garments with company profiling, special requirements apply. Too large logos may jeopardise the classification of the garment. For optimum and safe company profiling, please contact us at Snickers Workwear for more information. We'll be happy to help you find the best solution to make your company stand out.

Note: High-Vis jackets, rainwear and topwear are not available in outside sizes.

PAINTER'S COLLECTION

OUTSTANDING FREEDOM AT WORK

Our painters workwear is a cutting-edge range designed for hard-working men and women who deserve the best. With advanced ergonomic design and a perfect fit, our painter's collection combines outstanding comfort and freedom of movement with exactly the right built-in functionality you need to get your job done. Making your workday easier, safer and more productive. Painting has never been more enjoyable.

PERFECT FIT, AMAZING COMFORT

Our Painter's trousers feature an advanced ergonomic cut with Twisted Leg™ design for a perfect fit, outstanding working comfort and optimal freedom of movement.

FEMALE FIT

All women's garments in our Painter's Collection are cut specifically for women. The trousers feature a low cut with shaped waistband, and the Soft Shell jacket is designed with a perfect fit for the female form.

The convenient cloth holder loop in 100% polyester for extra durability.

BUILT-IN FUNCTIONALITY

Count on just the right functionality and reinforcements for the painter's needs. For example the hardwearing cloth holder loop in 100% polyester the putty tool/ruler pocket and knife fastener.

ADVANCED KNEE PROTECTION

Save your knees with the most advanced certified knee protection available. The polyesterreinforced kneepad pockets are designed for the KneeGuard™ positioning system, giving you superior and durable certified knee protection that follows your every move.

With the putty tool/ruler pocket and knife fastener for Hultafors knives you always have the essentials within convenient reach.

TOP-QUALITY SERVICE

SHARPEN YOUR PROFILE WITH OUR NEW SERVICE LINE

We know you run a fast-paced operation. Performing your best and always making a good impression is everyday business. And that is what our new Service Line is all about. A range of garments designed specifically to help you and your company to deliver a top-quality service that your customers will remember. Whether you are in transport, distribution, maintenance, assembly, light industry or perhaps facility management, our new Service Line is ready to deliver. Combining contemporary design for amazing fit and comfort with just the right functionality. And of course, every garment is ready for your company logo.

MAKE AN IMPRESSION

Modern workwear with a strong profile is a true image booster. And with company profiling, you will reinforce the impression. It's a stamp of quality and helps your company stand out, making it more distinct and recognised for the right reasons.

COMFORT ON THE MOVE

Every garment in the new Service Line features a modern cut for a perfect fit. Trousers with pre-bent legs, jackets with pre-bent sleeves and soft and stretchy easy-care fabric ensure maximum freedom of movement and superior working comfort.

EASY CARE FABRIC

Our Service Line is made of durable and dirt-repellent yet soft and stretchy easy-care fabric for superior long-lasting comfort. It withstands industrial washing and retains stretch, shape and colour over the long term.

PROFILING AND PERSONALISED PACKAGING

Snickers Workwear offers a complete range of company profiling services. And with personalised packaging everyone gets their garments in a package labelled with their name. This facilitates your internal distribution and guarantees that everybody gets the right garments and the right sizes.

FIT TO PERFORM

Your hands are your most important tools, so we want to give them the best. With our wide range of advanced work gloves you can count on the ultimate combination of functionality, durability and protection to match your job. Cut and sewn or seamless coated? Whatever your preference, count on cutting-edge work gloves made of superior materials with class-leading performance and working comfort.

FOUR FAMILIES – FOUR CHARACTERS

Precision. Light and flexible gloves with emphasis on dexterity and fit. Perfect for precision work. The flexible materials on the dorsal side of the hand, knuckle protection, cushioning and reinforcement prints provide optimal protection and dexterity.

Power. The workhorse gloves for heavy duty works like carrying, loading and tearing. The unique curved shape gives a strong and secure grip. Sophisticated patterns and durable materials create a comfort and protection never seen before.

Weather. Gloves for work in rough and cold weather. Advanced materials provide greater dexterity, friction and grip even in wet, cold and slippery conditions. These are the gloves that keep your hands warm and protected no matter what weather you work in.

Specialized. Gloves optimised for very specific tasks. With the best possible materials and unique functions. Each glove is geared to provide the ultimate dexterity, protection and comfort for each individual hand and the task at hand.

- Nurtures dry and chapped hands and cuticles and makes them soft and smooth
- Moistures and softens dry, chapped hands and prevents cracks
- Contains hydrolysed Keratin which softens and improves
- Free from parabens
- 100 ml, with flip cap

MORE THAN STANDARD

Work gloves from Snickers Workwear meet the European requirements for protective equipment. Below you can read about applicable classifications for our gloves.

EN 388

EN 388 Gloves Giving Protection from Mechanical Risks

This standard applies to all kinds of protective gloves in respect of physical and mechanical aggressions caused by abrasion, blade cut, tearing and puncture. Protection against mechanical risks is expressed by a pictogram followed by four numbers (performance levels), each representing test performance against a specific risk. The performance level is from 1–5, where 4 or 5 is the best result.

a. Resistance to abrasion: based on the number of cycles required to abrade through the sample glove. The resistance to abrasion is measured by the number of cycles

required for hole to occur. Highest protection is 4 and is equal with 8000 cycles.

b. Blade cut resistance: based on the number of cycles required to cut through the sample by a circular rotating blade at a constant speed. The result is compared with a reference material and an index is obtained. Highest protection is 5 and is equal with an index of 20.

c. Tear resistance: based on the amount of force required to tear the sample. The resistance to tear is defined as the force necessary to propagate a tear in a rectangular specimen slit half way along its

length. The specimen shall be torn totally apart. Highest protection is 4 and is equal with 75 Newton.

d. Puncture resistance: based on the amount of force required to pierce the sample with a standard sized point and speed (10 cm/min). Highest protection is 4 and is equal with 150 Newton.

These are the requirements for each performance levels. The performance level is displayed alongside the pictogram.

Performance level	0	1	2	3	4	5
a. Abrasion resistance (cycles)	<100	100	500	2000	8000	–
b. Blade cut resistance (factor)	<1.2	1.2	2.5	5.0	10.0	20.0
c. Tear resistance (newton)	<10	10	25	50	75	–
d. Puncture resistance (newton)	<20	20	60	100	150	–

EN 407

EN 407

This standard specifies thermal performance for protective gloves against heat and/or fire. Snickers Workwear has gloves with resistance to flammability.

a. Resistance to flammability
(performance level 0 – 4)

b. Contact heat resistance
(performance level 0 – 4)

c. Convective heat resistance
(performance level 0 – 4)

d. Radiant heat resistance
(performance level 0 – 4)

e. Resistance to small splashes of molten metal (performance level 0 – 4)

f. Resistance to large splashes of molten metal (performance level 0 – 4)

Gloves must achieve at least Performance level 1 for abrasion and tear strength.

X=performance level not tested.

Resistance to flammability: based on the length of time the material continues to burn and glow after the source of ignition is removed. The seams of the glove shall not come apart after an ignition time of 15 seconds.

Contact heat resistance: based on the temperature range (100–500 °C) at which the user will feel no pain for at least 15 seconds. If an EN level 3 or higher is obtained, the product shall record at least EN level 3 in the flammability test. Otherwise, the maximum Contact heat level shall be reported as level 2.

Convective heat resistance: based on the length of time the glove is able to delay the transfer of heat from a flame. A level of performance shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

Radiant heat resistance: based on the length of time the glove is able to delay the

transfer of heat when exposed to a radiant heat source. A performance level shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

Resistance to small splashes of molten metal: the number of molten metal drops required to heat the glove sample to a given level. A performance level shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

Resistance to large splashes of molten metal: the weight of molten metal required to cause smoothing or pinholing across a simulated skin placed directly behind the glove sample. The test is failed if metal droplets remain stuck to the glove material or if the specimen ignites.

EN 511

EN 511 Gloves Giving Protection from Cold

This standard applies to any gloves to protect the hands against convective and contact cold down to –50 °C. Protection against cold is expressed by a pictogram followed by a series of 3 performance levels, relating to specific protective qualities. Highest protection is 4.

a. Resistance to convective cold:

Performance level 0–4. Based on the thermal insulation properties of the glove which are obtained by measuring the transfer of cold via convection.

b. Resistance to contact cold:

Performance level 0–4.

Based on the thermal resistance of the glove material when exposed to contact with a cold object.

c. Permeability by water: 0 or 1.

0 = water penetration after 30 minutes of exposure.

1 = no water penetration.

X=performance level not tested.

All gloves must also achieve at least performance level 1 for abrasion and tear according to EN 388.

9761 Yo-yo for ID badge holder

There and back again. Just pull, show your ID card and let the automatically rewinding cord do the rest.

- Easy to attach to ID badge 9760
- Ensures your ID card is accessible and always in place
- 60 cm long and durable string attached to a rotating disc

Material: Nylon string, Plastic housing.

Size: One size

OUTDOOR ACTION

Our Junior range is a tribute to intense playing and true young outdoor action. Comfortable and cool-looking garments made from specially selected fabrics for durable playing comfort all day long. Designed for kids aged 3-10 years.

5866

7506 Junior Soft Shell Jacket

Face the elements with attitude in this Junior soft shell jacket, ready for serious outdoor action. Hardwearing, water repellent and breathable for happy smiles during intense activities.

- Pre-bent sleeves and ergonomic cut for maximum freedom of movement
- Detachable hood with high-vis details and for enhanced safety and comfort
- Zipped pockets for safe storage of keys and stuff

Material: Water repellent, breathable and stretchable laminated Soft Shell fabric in 100% Polyester, 285 g/m².

Size: 98/104, 110/116, 122/128, 134/140

5804

7504 Junior Zip Hoodie

Warm and cosy, with a cool look. Maximise your activities in this Junior hoodie. Made to keep its shape wash after wash. Features comfy kangaroo pockets to warm freezing little hands.

- Pre-washed for a comfortable and pre-shrunk fit
- Kangaroo pocket to warm the hands
- Thumb grips along with ribbed cuffs and bottom hem protect against cool breezes

Material: Comfortable, durable fabric in 65% Polyester 35% Cotton, 300 g/m². Pre-washed and brushed inside.

Size: 98/104, 110/116, 122/128, 134/140

5866

7501 Junior Holster Pocket Trousers

Play hard in these work trousers, specially designed for children aged 3-10 years. Made of extremely comfortable yet hardwearing Rip-stop fabric. Features all the pockets you can dream of for tools and gear.

- Adjustable waist for optimal fit and comfort
- Padded and reinforced knees and reinforced ankles for enhanced protection and durability
- High-vis details and reflective features for cool look and enhanced visibility and safety

Material: Extremely durable and soft Rip-stop fabric, 65% Polyester/35% Cotton, 200 g/m². 100% Polyester reinforcements.

Size: 98, 104, 110, 116, 122, 128, 134, 140

T-SHIRT PROFILING

Heat-sealing is the best choice when profiling your company T-shirts. Count on high quality in any size and colour.

QUALITY EMBROIDERY

With embroidery you get quality with every stitch, but remember that words or symbols smaller than 5 mm can be difficult to read.

A.P.S. AND GORE-TEX® PROFILING

When profiling your waterproof garments, heat sealing is the way to go. If you prefer embroidery, we will tape the rear of the embroidery to make sure the garment retains its waterproof characteristics.

FLEECE PROFILING

For a company-profiled fleece, embroidery is the obvious choice since heat-sealing might leave marks in the fabric.

REFLECTIVE STRIPES

We can sew additional reflective stripes onto your work trousers and jackets. A cost-efficient solution to boost your personal protection.

HIGH-VIS PROFILING

Profiling High-Vis garments is rather special. Excessively large logos may jeopardise the classification of the garment. For optimum and safe company profiling, please contact us for more information.

SHOW YOUR LOGO

When done right, company profiling pays off. It is a stamp of quality that says a lot about you and your company. It helps your company stand out, making it more distinct and recognised for the right reasons. With Snickers Workwear you know that you are turning to the experts – offering a complete range of value adding services and product options. The right colours, customised embroidery and personalised packaging, just to name a few. Contact us today for all the inspiring details.

Our embroidery embodies quality with every stitch. Giving your workwear an image boost that stands out in all the right ways – for a long time to come.

With our advanced heat-sealing technique you get distinctive high-quality prints in the sizes and colours of your choice.

At Snickers Workwear we only use high-quality threads to make sure your company logo stands out in the long run.

For the ultimate in company profiling, don't hesitate to talk to our experts. They know what works best and can suggest a cost-efficient solution designed for you and your company.

PERSONALISED PACKAGING

When you order a range of garments for all employees we have the perfect service for you: personalised packaging. That means everyone gets all his or hers garments in a package labelled with their name. This facilitates easier internal distribution at your company and guarantees that everybody gets the right garments and the right sizes. Easy, convenient and personal.

MEASURE RIGHT – FOR A GOOD FIT

Carefully follow our measuring tips below to make sure you get the right size. Snickers Workwear keeps all standard sizes in stock for speedy deliveries (see specific garment for the standard size range). We also offer special sizes – delivery may take a little longer, but it's well worth it. Outside sizes are available to order with 50% extra surcharge.

ENSURE YOU GET OPTIMALLY FITTING GARMENTS – TRY THEM ON FOR REAL!

Get the right size!
Use our
size generator at
snickersworkwear.com

IMPORTANT MEASUREMENT TIPS

1. Get help from someone to take your measurements.
2. Take measurements dressed in body-tight underwear.
3. Measure tight against/around your body, but without the measuring tape being pulled so hard that it “cuts” in.
4. When measuring the inside leg, make sure the measuring tape is firmly extended.

A. Body length

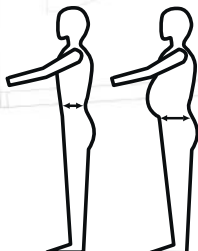

Top of the head to the sole of the foot

B. Chest

Chest width, horizontally at the widest point.

C. Waist

Waist measurement - measure horizontally at navel height, or under the stomach if you are a large size.

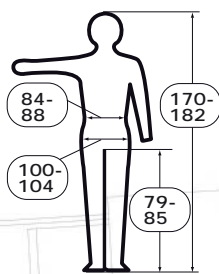

D. Seat

Seat width, horizontally at the widest point.

E. Inside leg

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

SIZE 50
MEN

Every CE-marked garment has to have a label with a pictogram that shows the size and the body measurements of the person that the garment is intended for. This means that you always can check inside the garment to see the size.

GETTING THE RIGHT SIZE

1. Choose the right size chart below:

3XXX for 3-series trousers

6XXX for 6-series trousers

2. Look for your body measurements in the chart and choose the corresponding size.

3. To ensure and optimal fit – try them on for real!

MEN'S ONE-PIECE TROUSERS

IMPORTANT: It is important that you take into consideration your full waist measurement (C) when choosing the size of one-piece trousers.
You may need a bigger size in one-piece trousers compared to on-the-waist trousers to make sure there is enough space for your stomach.

GLOVES

Always choose gloves with the right finger length. Try them on to find the right one.

YOUR SIZE		7	8	9	10	11	
1	Hand circumference	MM	178	203	229	254	279
2	Hand length	MM	171	182	192	204	215
	Minimum length of glove*	MM	230	240	250	260	270

* If the glove is made for a specific application, it is possible to depart from the requirements of minimum glove length if it is stated in the user guide.

A. Body length

Top of the head to the sole of the foot

B. Chest

Chest width, horizontally at the widest point.

C. Waist

Waist width, horizontally at navel height.
Important measurement for one piece trousers and overalls.

D. Seat

Seat width, horizontally at the widest point.

E. Inside leg

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

HIGH-TECH MATERIALS AT WORK

OEKO-TEX®

The OEKO-TEX® label indicates the additional benefits of tested safety for skin-friendly clothing and other textiles.

The International OEKO-TEX® Association is an independent test institute, testing textiles for harmful substances according to OEKO-TEX® Standard 100 for textile products of all types which pose no risk whatsoever to health.

Poron® XRD®

Poron® XRD® Extreme Impact Protection. Flexible and lightweight shock absorbing foam material. The impact force dissipates and is distributed over a larger area, resulting in lower stress to the wearer. Poron® XRD® is a trademark of Rogers Corporation.

Hipora®

Hipora® is a waterproof and breathable membrane used for gloves. It keeps your hands dry and comfortable.

Hipora® is a trademark of Kolon Industries.

dri release®

drirelease® is keeping you cool, dry and fresh. drirelease® wicks moisture by moving liquid away from skin and pushing it to the outside of the fabric where it can evaporate quicker.

CORDURA®

An extremely tough and hardwearing material, used to reinforce exposed parts such as pockets, knees and sleeves. It is also water and dirt repellent, easy to care for and retains its shape.

It is a high technology fabric made with air-textured polyamide fibres able to meet the toughest standards of strength and durability. CORDURA® is a trademark of INVISTA Inc.

Thinsulate™

Thinsulate™

Thinsulate™ insulation has very high insulation properties compare to its weight. The fine fibers that make up Thinsulate™ insulation, work by trapping air molecules between you and the outside. The more air a material traps in a given space, the better it insulates you from the cold outside air.

Thinsulate™ is breathable, moist-resistant and machine washable. Thinsulate™ is a trademark of 3M™.

Coolmax®

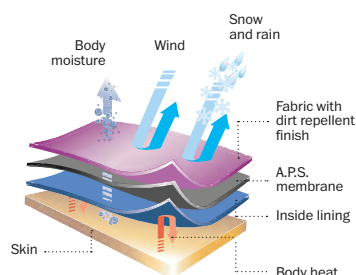

Coolmax® fabrics are designed to move moisture away from the body and enhance fabric drying rate, thus keeping you feeling cool and dry. The Coolmax® fiber is a specially engineered polyester fibre with an increased surface area. The fibre forms a transport system that pulls moisture away from the skin to the outer layer of the fabric where it spreads and dries quick.

The performance of Coolmax® is inherent in the fibres structure itself, thereby providing consistent performance wash after wash. Coolmax® is a trademark of INVISTA Inc.

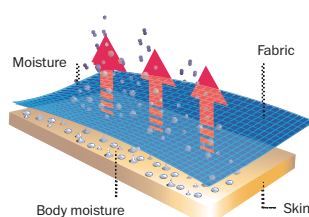

APS

A 3-layer construction developed to keep wind, water and dirt out while maintaining high breathability.

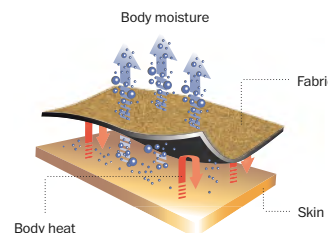

AVS

Breathes while it keeps your body dry - transporting sweat and moisture away from your skin.

AIS

A lightweight and soft micro fleece fabric. It's an ideal mid-layer for any outdoor activity with its insulating and high moisture transportation ability.

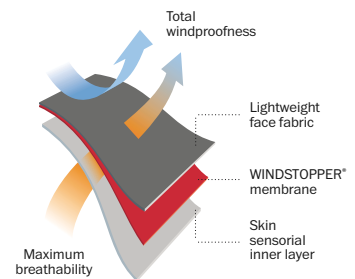

WINDSTOPPER®

WINDSTOPPER® materials combines total windproofness with maximum breathability to keep you warm and comfortable. The windproofness protects your body's warmth from the chilling effects of wind and weather. Maximum breath-

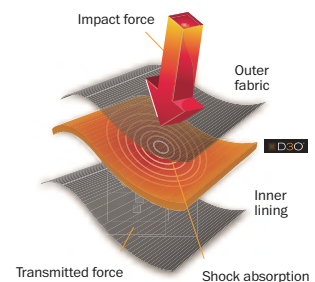

ability prevents overheating and perspiration build-up by allowing moisture vapour to escape easily. A durable water repellent finish provides additional weather protection. WINDSTOPPER® is a trademark of W. L. Gore & Associates, Inc.

D3O®

D3O® smart materials specialise in impact protection and shock absorption. Its unique patented polymer composites contains a chemically engineered dilatant as an energy absorber. The material's molecules flow freely in standard conditions, but on impact, they lock together to absorb and disperse energy, before instantly returning to their flexible state. This unique characteristic provides enhanced impact

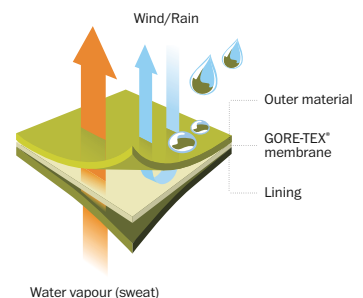

protection, while providing versatile and flexible materials that can be manufactured for a host of impact protective applications. Note: D3O® does not "go hard". Snickers Workwear uses different D3O® material grades specially tuned for a wide range of temperatures that offer enhanced cushioning, longterm comfort and superior impact protection on key contact areas.

GORE-TEX®

Technical garments with GORE-TEX® are extremely durable, waterproof and are guaranteed to keep you dry and comfortable – all day long. The GORE-TEX® membrane has over 1.4 billion pores per square cm and the pores are 20 000 times smaller than a drop of water, but 700 times bigger than a molecule of moisture vapour. This

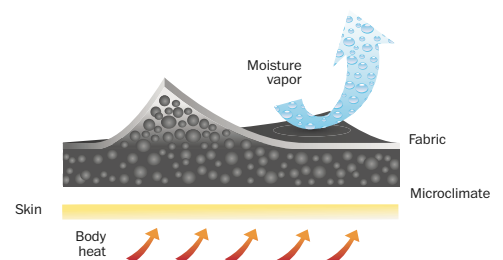

prevents water from penetrating, while it aids your body's natural cooling process by allowing perspiration vapour to escape. Special GORE-SEAM® tape ensures that all seams are 100% water proof. GORE-TEX® is a trademark of W. L. Gore & Associates, Inc.

37.5®

In fabrics with 37.5® technology, patented natural active particles permanently embedded at the fiber level capture and release moisture vapor. Not only do these active particles provide 800% more surface area to the fiber, they also provide a unique driving force to remove moisture vapor from the skin. By actively responding to body heat, the particles use this energy

from the body to accelerate the vapor movement and speed up the conversion of liquid to vapor, significantly increasing drying rates. This means the hotter the user gets, the stronger the driving force removing moisture becomes—and the more comfortable the garment remains. 37.5® is a trademark of Cocona, Inc.

Patent and Registered Community Design (RCD)

Innovation and product development are at the very core of the Snickers Workwear brand. As a result of this intense focus, many of our advanced products or solutions feature registered patents. Many products are also covered by Registered Community Design (RCD). In this catalogue, products with registered design or with functions included in patent applications or patents are marked with the symbols below. For further information, please visit snickersworkwear.com.

This product is patented or has a patent application in selected countries both within Europe and world wide.

This product has a Registered Community Design (RCD), or national design registrations.

HULTAFORS GROUP

IN EVERY WAY, A PARTNER TO RELY ON.

A UNIQUE PRODUCT FAMILY

HULTAFORS **GROUP** offers a dynamic range of premium brands to rely on – for distributors and craftsmen alike. Each brand within the Group is united with a common passion: to keep craftsmen at the forefront in terms of functionality, safety, protection and overall productivity.

Each brand represents expertise in its particular area and brings unparalleled knowledge and insight into the unique on-the-job challenges encountered by craftsmen. This makes it possible for us to meet, even anticipate, evolving demands by designing innovative state-of-the-art products that make the craftsmen's workday safer, easier and more productive.

Excelling in brand-driven product categories within the industry and construction equipment sectors, we offer

customers and users a best-in-class experience. And by using our high-value products as well as benefitting from brands built around their needs, craftsmen can be at the forefront every day and take great pride in their work.

Hultafors Group consists of Snickers Workwear, Wibe Ladders, Hultafors, Solid Gear, Toe Guard and Dunderdon – six leading brands that together offer a unique product family for professional craftsmen.

Snickers Workwear

– WEAR THE DIFFERENCE.

Snickers Workwear is one of the leading brands in the workwear industry in Europe and is represented in more than 20 countries. Snickers Workwear offers advanced workwear for craftsmen who want the ultimate in on-the-job safety, protection and functionality.

Solid Gear

– ONE STEP AHEAD.

Solid Gear provides utility footwear for professional workers. We insist on nothing less than perfection and make sure that every detail counts. Step into our shoes and experience true passion for shoe making.

Hultafors

– TOOLS TO RELY ON.

Hultafors is a leading international brand offering innovative state-of-the-art hand tools with the best possible functionality, precision and reliability. Designed for construction and industry.

Dunderdon

– THE PRODUCT MAKES THE BRAND.

Offering honest, timeless and casual design. Dunderdon's products should represent the highest craftsmanship and innovation, while never compromising on fit and style.

Wibe Ladders

– SAFETY IN EVERY STEP.

Wibe Ladders is the leading Nordic manufacturer of innovative tradesmen's ladders, trestle steps and scaffolding that help trade professionals work more safely and efficiently.

Toe Guard

– SAFETY WITHOUT COMPROMISE.

The Toe Guard brand represents safety without compromise, timeless design and affordable products. Our aim is to offer great products at competitive prices.
